DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 11/9/09 has been entered.

Response to Amendment

2. The amendments to Claims 39-41, 57, 65-67 in the submission filed 11/9/09 are acknowledged and accepted.
3. The cancellation of Claims 36-38 in the submission filed 11/9/09 is acknowledged and accepted.
4. The addition of Claims 68-71 in the submission filed 11/9/09 is acknowledged and accepted.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 68-71 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim elements “means for selecting a location for an elemental hologram of a holographic stereogram in a holographic recording medium” (Claim 68, lines 2-3) and “means for positioning a voxel-control lens at a distance from the selected location for the elemental hologram” (Claim 68, lines 10-11) are means (or step) plus function limitations that invokes 35 U.S.C. 112, sixth paragraph. However, the written description fails to disclose the corresponding structure, material, or acts for the claimed function. In the instant case, the specification and drawings of the instant application fail to disclose any associated or corresponding structure, material, or acts for the functions of selecting a location for an elemental hologram or of positioning a voxel-control lens. Claims 69-71 are dependent on Claim 68, and hence inherit the deficiencies of Claim 68.

Applicant is required to:

- (a) Amend the claim so that the claim limitation will no longer be a means (or step) plus function limitation under 35 U.S.C. 112, sixth paragraph; or
- (b) Amend the written description of the specification such that it expressly recites what structure, material, or acts perform the claimed function without introducing any new matter (35 U.S.C. 132(a)).

If applicant is of the opinion that the written description of the specification already implicitly or inherently discloses the corresponding structure, material, or acts so that one

of ordinary skill in the art would recognize what structure, material, or acts perform the claimed function, applicant is required to clarify the record by either:

- (a) Amending the written description of the specification such that it expressly recites the corresponding structure, material, or acts for performing the claimed function and clearly links or associates the structure, material, or acts to the claimed function, without introducing any new matter (35 U.S.C. 132(a)); or
- (b) Stating on the record what the corresponding structure, material, or acts, which are implicitly or inherently set forth in the written description of the specification, perform the claimed function. For more information, see 37 CFR 1.75(d) and MPEP §§ 608.01(o) and 2181.

Allowable Subject Matter

- 7. Claims 39-41, 57, 65-67 are allowed. See Section 8 of the Office Action dated 9/9/09.
